CONTENTS

Volume 11, 1959

Number 1 — February 1959

L. Dufour — Sur le taux de variation adiabatique de la température en fonction de la pression dans une masse d'air contenant un cristal de glace sphérique 1
G. J. Haltiner — On the theory of convective currents 4
W. A. Mordy — Computations of the growth by condensation of a population of cloud droplets 16
A. Wiin-Nielsen — On certain integral constraints for the time-integration of baroclinic models 45
G. Fischer — Ein numerisches Verfahren zur Errechnung von Windstau und Gezeiten in Randmeeren 60
S. Fonselius and G. Östlund — Natural radiocarbon measurements on surface water from the North Atlantic and the Arctic Sea 77
L. B. Lockhart, Jr., R. A. Baus and I. H. Blifford, Jr. — Fission product radioactivity in the air along the 80th meridian — January—June 1957 83
P. S. Goel, N. Narasappaya, C. Prabhakara, Rama Thor and P. K. Zutshi — Study of cosmic ray produced short-lived P^{32}, P^{33}, Be^{7}, and S^{35} in tropical latitudes 91
S. A. E. Johansson — On the influence of cosmic radiation on the isotopic composition of the elements 101
H. Alfvén — Momentum spectrum of cosmic radiation 106
D. Venkatesan and A. Dattner — Long term changes in the daily variation of cosmic ray intensity. 116
E. Nishimura, Y. Kishimoto and Y. Tanaka — Observed secular tilting motion of the ground which preceded the occurrence of several destructive earthquakes 130

Shorter Contribution —

V. P. Starr — Hydrodynamical analogy to $E = mc^2$ 135
Current data on the chemical composition of air and precipitation 139
CO_2-values in Scandinavia August—October 1958 145

Number 2 — May 1959

E. B. Kraus — The evaporation-precipitation cycle of the trades 147
A. S. Monin and A. M. Obukhov — A note on general classification of motions in a baroclinic atmosphere 159
K. Bryan — A numerical investigation of certain features of the general circulation 163
M. E. Stern — The moving flame experiment 175
A. Wiin-Nielsen — On the application of trajectory methods in numerical forecasting 180
P. Welander — A theoretical power-law for the size distribution of small particles or drops falling through the atmosphere 197
W. G. Durbin — Droplet sampling in cumulus clouds 202
B. J. Mason — The formation of rain by coalescence in very shallow cumulus 216
J. R. Bray — An analysis of the possible recent change in atmospheric carbon dioxide concentration .. 220
A. Svansson — Some computations of water heights and currents in the Baltic 231
A. Dattner and D. Venkatesan — Anisotropies in cosmic radiation 239
E. Åström — On density and isotropy of an ionized gas in a magnetic field 249

Shorter Contribution —

F. Wippermann — Kartenmässige Darstellung atmosphärischer Felder auf dem Schirm einer Kathodenstrahlröhre 253
Letters to the Editor 256
Book Review 257
Current data on the chemical composition of air and precipitation 259
CO_2-values in Scandinavia November 1958—January 1959 265

Number 3 August 1959

J. Kuettner — The band structure of the atmosphere 267
A. Robinson and H. Stommel — The oceanic thermocline and the associated thermohaline circulation 295
P. Welander — An advective model of the ocean thermocline 309
B. Hultqvist, J. Aarons and J. Ortner — Effects of the solar flares of 7 July 1958 319
B. Hultqvist — On the interpretation of ionization in the lower ionosphere occurring on both day and night side of the earth within a few hours after some solar flares 332
J. A. Gast and T. G. Thompson — Evaporation of boric acid from sea water 344
P. Welander — On the frequency response of some different models describing the transient exchange of matter between the atmosphere and the sea 348
E. Hemmingsen — Permeation of gases through ice 355
V. P. Starr — Note concerning the influence of rotation on convection 360
Book Review 364
Current data on the chemical composition of air and precipitation 366
CO_2-values in Scandinavia February—April 1959 373

Number 4 November 1959

E. Eriksson — The yearly circulation of chloride and sulfur in nature; meteorological, geochemical and pedological implications. Part I 375
J. F. Bleichrodt, J. Blok, R. H. Dekker and C. J. H. Lock — The dependence of artificial radioactivity in rain on rainfall rate 404
S. Twomey and P. Squires — The influence of cloud nucleus population on the microstructure and stability of convective clouds 408
H. L. Kuo and J. Nordö — Integration of four-level prognostic equations over the hemisphere 412
B. Saltzman — On the maintenance of the large-scale quasi-permanent disturbances in the atmosphere 425
A. Wiin-Nielsen — On a graphical method for an approximate determination of the vertical velocity in the mid-troposphere 432
H. Taba — The horizontal and vertical wind profiles of the subtropical and polar jet for January 1—7, 1956 and the variation of the equivalent barotropic level 441
G. J. Haltiner — The diurnal variation of the wind 452
E. Lisitzin —Uninodal seiches in the oscillation system Baltic proper—Gulf of Finland 459
H. Trefall and J. Nordö — On systematic errors in the least squares regression analysis, with application to the atmospheric effects on the cosmic radiation 467

Shorter Contributions —

G. Östlund — Isotopic composition of sulfur in precipitation and sea-water 478
V. P. Starr — Further statistics concerning the general circulation 481
Index 484
